Anmerkung. Der Artikel beschreibt, wie man mit modernen innovativen pädagogischen Technologien im Fremdsprachenunterricht an "Temurbek-Schulen" gute Ergebnisse erzielt.

Schlüsselwörter. Fremdsprache, Innovation, Bildung, Technologie, Lehrer, Computer, Problem, moderne Bildung.

WITH THE HELP OF INNOVATIVE PEDAGOGICAL TECHNOLOGIES FORMING PROFESSIONAL COMPETENCE OF STUDENTS "TEMURBEKLAR MAKTABI"

[1]Alimardonov Zohid Shukurullayevich, [2]Sapaeva Barno Shanazarovna

[1]Doctor of Philosophy (PhD) of Pedagogical Sciences, Associate Professor, Deputy Head of the Department of Psychology and Pedagogy of the Military-Technical Institute of the National Guard, Uzbekistan.

[2]Teacher, Urgench Temurbek School, Uzbekistan.

Abstract. The article describes how to achieve high results in teaching foreign languages in "Temurbek schools" using modern innovative pedagogical technologies.

Keywords. Foreign language, innovation, education, technology, teacher, computer, problem, modern education.

New methods and requirements for foreign language teaching in the country have been developed in accordance with the Recommendations of

the European Framework for Assessment of Knowledge and Skills of Foreign Language Teachers (CEFR).

According to him, textbooks have been created for students of secondary schools and vocational colleges. In accordance with these requirements, classrooms are equipped with stands and new information and communication technologies. The demand for learning a foreign language is growing day by day. Foreign language science is divided into four aspects (reading, reading, listening comprehension, and speaking), each of which provides specific concepts and skills.

Educational technology is the effective use of modern information technology in the educational process. It also aims to improve the quality and effectiveness of education through the introduction of modern innovative technologies in the educational process [1].

In particular, there are several advantages to using such information and communication technologies in learning a foreign language.

The use of modern technologies in education is also an important factor for students to be familiar with and use information and communication technologies.

Teaching and learning a foreign language using modern technology is one of the most effective ways.

In this process, including:

● Using computers, the student can watch and listen to foreign language videos, demonstrations, dialogues, movies or cartoons;

● Listen to and watch foreign language radio and television programs;

● CD players are available. The use of these tools makes the process of learning a foreign language more interesting and effective. In the process of globalization, it is difficult to imagine our lives without the Internet [2].

One of the most effective ways to learn and teach a foreign language is to use it effectively. You will be able to communicate with foreign speakers through the Internet. Writing exercises can be improved by writing a letter via e-mail. The most important issue is the introduction of modern communication technologies in the educational process, their purposeful and correct, effective use, through which to increase the interest of students in a foreign language, to increase the effectiveness of teaching.

This will allow for the use of innovative educational technologies and increase demand.

There are several types of innovative educational technologies available today. When they are used extensively and in a variety of ways to cover a topic in class, the lesson is more effective and the students' interest in the lesson is increased.

It is intended to increase the effectiveness of education through the introduction of innovations in the educational process and their implementation.

The use of a variety of role-playing, action-packed games in foreign language teaching can also increase interest in language learning in the classroom.

When teaching a foreign language, it is useful to use graphic organizers to explain new words and grammar rules.

These can be easily memorized by graphic organizers.

The use of different tables in the process of teaching a foreign language is also very effective. Using tables in the learning process, students can follow a specific grammatical rule, such as composing sentences using tenses and placing new words.

At a time when there is a great need to learn a foreign language, the effective use of modern information technologies, innovative educational

technologies in the educational process makes this process more effective. The effectiveness of innovative educational technologies lies in their correct and effective use in the educational process.

The role of modern technology in language learning and teaching is invaluable. The use of technology is useful in every aspect of learning a foreign language (reading, reading, listening and speaking). For example, to listen and understand, of course, it is impossible to do this process without a computer, player, CD.

Listening is one of the most important parts of language learning. This requires the student to pay attention to the speaker's pronunciation, grammatical rules, vocabulary, and meanings at the same time. An important factor in the use of modern technologies in education is the ability of students to know and use information and communication technologies.

Today, interactive games are becoming a tradition in schools. It is well known that a variety of play-based activities help students demonstrate their abilities, focus, increase their knowledge and skills, and become stronger. The basis of the use of game technology is the activity that activates and accelerates the student. According to psychologists, the psychological mechanisms of playful activity are based on the fundamental needs of the individual to express themselves, to find a stable place in life, to self-manage, to realize their potential. At the heart of any game should be the generally accepted principles and tactics of education. Learning games should be based on the subjects. During the games, the student is more interested in this activity than in a normal lesson and works more comfortably. It should be noted that the game is, first of all, a way of teaching. Students are interested in playful lessons, they strive to win, and the teacher uses them to educate the student. The student is interested in

believing that he or she can play, speak, listen, understand, and write in English[3].

We know that in the current educational process, the student must be a subject. Focusing on more interactive methods will increase the effectiveness of education. One of the most important requirements for English lessons is to teach students to think independently. Today, English teachers use the following innovative methods, based on the experience of United States statues, English educators: - "Creative Problem Solving" To use this method, the beginning of the story is read, how it ends. students are referred to the judgment of the students;

- Merry Riddles is an important part of teaching English to students, as they learn words they are unfamiliar with and find the answer to a riddle;

- Quick answers help to increase the effectiveness of the lesson;

- "Warm-up exercises" - the use of various games in the classroom to engage students in the lesson [4];

- "Pantomime" (pantomime) is a method that can be used in a lesson where very difficult topics need to be explained, or when students are tired of writing exercises;

- A chain story method helps to develop students' oral skills;

- Acting characters This method can be used in all types of lessons. Professionals such as Interpretter, Translator, Writer, and Poet can participate in the class and talk to students;

- The Thinkers meeting can "invite" poets and writers such as W. Shakespeare, A. Navoi, R. Burns. At the same time, using the words of wisdom they say in class will help young people to become perfect human beings;

- The method of "When pictures speak" is more convenient and helps to teach English, to develop students' oral speech, it is necessary to use thematic pictures;

- Quiz cards are distributed according to the number of students and allow all students to attend classes at the same time, which saves time [5].

As we have seen, each innovative technology has its own set of advantages. All of these methods involve collaboration between teacher and student, active participation of the student in the educational process [6].

In short, the use of innovative methods in English lessons develops students' logical thinking skills, fluency, and the ability to respond quickly and correctly. Such methods stimulate the student's desire for knowledge. The student strives to prepare well for the lessons. This makes students active participants in the learning process. As the education system sets itself the task of nurturing a free-thinking, well-rounded, mature person, in the future we, future teachers, will contribute to the more effective development of innovative technologies. possible.
